Skills

Hardware & Embedded:

SystemVerilog · FPGA
ESP32 · FreeRTOS
PlatformIO · Arduino
Bluetooth LE
KiCad · LTspice · Verilator
Oscilloscope · Soldering

Software:

C · C++ · Python
Kotlin · Android Auto · Swift
Flutter · Dart
TypeScript · Astro · React
Flask · Tailwind · Git
GLSL / AGSL shaders

Design:

Figma
HTML · CSS · JS
Blender · Fusion
Final Cut Pro · Logic Pro
Full Adobe Suite
3D Printing

Education

Purdue University B.S. Computer Engineering Technology

Expected **May 2028**

Minors in Psychology and ECE + Entrepreneurship Certificate.

Coursework: Digital System Design, Data Structures, Advanced C Programming, Electrical Engineering Fundamentals I, Python for Data Science, Systems Development.

Work

XR / AR Product Intern DirtView, Remote

Sep 2026 – Present

- Developing a platform that brings XR smart glasses to construction management (DirtVision)
- Researching XR/AR wearable platforms and SDKs; writing requirements, user stories, and test plans

Software Engineering Extern Digital Realty, Remote

Jun – Jul 2026

- Automated HIPAA-compliance report conversion from Word to Excel, saving an estimated **2–3 months**
- Shipped Python and Word-VBA versions that run fully offline, no extra installs, under NDA

UI/UX Design Extern Motio, Remote

May – Jul 2026

- Rebuilt an internal data-retention console screen by screen; handed off a React-ready prototype
- Made destructive actions safer (type-to-confirm, paste blocked) and faster (command palette, shortcuts)

Project Manager, IntelliThings Embedded Systems @ Purdue (ES@P)

Aug 2026 – Present

- Co-leading a **25-member**, 3-subteam team building an LLM-powered, ESP32-based smart home system
- Running the 13-week build plan and weekly work sessions with the goal to present the final build at the ECE Spark Challenge
- Screened **72 applicants** to staff the team

UI/UX Design Contributor BlueBubbles (open source), Remote

Jun 2020 – Aug 2023

- Streamlined the full chat UI and co-designed the theming engine of an Android app that brings iMessage to Android phones and Windows/Linux computers; complete with tapbacks, GamePigeon support, and FaceTime calls
- Over **100K** downloads with a 4.6-star rating

Electronics Technician & Sales Associate CPR Cell Phone Repair

Sep 2022 – Aug 2023

- Repaired **~200** phones, tablets, laptops, and consoles a month: screens, software, board-level soldering
- Handled the ticket system and upsold screen protectors and phone cases to **80%** of customers

Projects

CowBubbles

Flutter · Dart · Kotlin · GLSL shaders

Full UI rewrite of OpenBubbles, the iMessage-for-Android fork of BlueBubbles (UI/UX contributor 2020–23), with an album-art-driven shader background. v0.1-alpha out.

github.com/rakkicow/CowBubbles

CarLyrics

Kotlin · Android Auto · MediaSession · AGSL

Apple Music-style word-synced lyrics on the car display for any music player, via MediaSession. **4** lyric-format parsers, **17** JUnit tests.

Working prototype.

TaskReceipt

Python · Bluetooth LE · Flask · Google Tasks

Prints Google Tasks to-dos on a ~\$6 Bluetooth receipt printer daily. Reverse-engineered its BLE protocol and set up a macOS login agent to automate it. Web portal to preview the render and adjust settings.

ESP32 Now-Playing Clock

C++ · ESP32-S3 · FreeRTOS · PlatformIO

USB dongle showing the Last.fm now-playing track and album art on a 160×80 LCD with a matching LED glow.

Also building: Mnemoo: Android XR glasses for dementia care with a HUD that names the face of the person you see and details your last interaction, and recaps the conversation. Like a second brain.

In class: an iCE40 FPGA Lunar Lander, a 3-band analog filter EQ, and a 0-1 BFS path solver in C.
